

# Reproductive Surgery Workshop: ECRES-GESEA Level 1 and Level 2 Training/ Certification and Symposium

Maribor, 18–21 November 2026

***Join an elite group of specialists through training, certification and theoretical keynotes  
overviewing all the fields in reproductive surgery.***

The ECRES-GESEA by ESHRE (European Society of Human Reproduction and Embryology) and the ESGE (European Society for Gynaecological Endoscopy) offers gynecologic surgeons the opportunity to evaluate and certify their theoretical knowledge and practical skills in minimally invasive gynecologic surgery for reproductive surgeon through a globally recognised, structured training and examination pathway.

In this workshop you will be able to enjoy a full immersive 3 days and half in the Reproductive Surgery world.

- 1) LASTT and HYSTT training: First you will be intensely trained to the GESEA psychometric skills in dry lab conditions for both laparoscopy and hysteroscopy.  
<https://gesea.eu/training-tools/lastt/>  
<https://gesea.eu/training-tools/hystt/>
- 2) SUTT training: Then you will be guided to a step by step practical learning process to get all the tips and tricks to be able to make intracorporal knots in laparoscopy  
<https://gesea.eu/training-tools/sutt/>
- 3) ECRES-GESEA Level 1 and Level 2 Certification: You will have the opportunity to get directly after the intensive training session the practical exam. You will pass the online theoretical exam after the workshop. Since both are completed you will receive your certificate
- 4) Symposium on Reproductive Surgery: worldwide experts in the reproductive surgery field will provide keynotes containing theoretical evidence-based scientific knowledge, surgical videos and tips and tricks on: isthmocoele, intra-uterine pathologies, hysteroscopy, endometriosis, tubal pathologies, uterine fibroids, adenomyosis, pelvic ultrasound, genital anomalies, fertility preservation and robotic assisted laparoscopy.
- 5) Exchange time: participants and experts will have a privileged moment to overview together your clinical cases. Bring small surgical videos (maximum 5 minutes) or complex clinical cases that you face in daily practice and had the opportunity to benefitate of the expert opinion during a round table.
